CSS Advanced - Workshop

Workshop for exercise for the ["CSS Advanced" course @ SoftUni](#).

Trainings Page

Create a web page using the [following design](#). Do not forget to follow **BEM methodology** and to implement **ITCSS architecture** for your project.

Constraints

- In your project directory create folders for each layer in ITCSS:
    - Settings
        - Add **settings-typography.css** stylesheet
    - Generic
        - Add **generic-normalize.css** stylesheet (Use the [following stylesheet](#) here or create one by yourself)
    - Elements
        - Add **elements-links.css** stylesheet
        - Add **elements-input-fields.css** stylesheet
    - Objects
        - Add **objects-containers.css** stylesheet
    - Components
        - Add **components-card.css** stylesheet
        - Add **components-button.css** stylesheet
        - Add **components-filter.css** stylesheet
        - Add **components-navigation.css** stylesheet
        - Add **components-header.css** stylesheet
        - Add **components-program.css** stylesheet
        - Add **components-footer.css** stylesheet
    - Utilities
        - Add **utilities-hidden.css** stylesheet
        - Add **utilities-centered.css** stylesheet
